Index to Volume 32

Numbers prefixed by S are Astrophysical Supplement numbers

Allen, B. J.—
See Musgrove, A. R. de L. 213
Taylor, R. B. 551

Allen, B. J., and Cohen, D. D.—
keV neutron capture cross section of ^{170}Yb 447

Amos, K.—
See Smith, R. 155

Anderson, Ronald, and Joshi, G. C.—
Meson mass formulae in $SU(5)$ 533

Argon: properties of states in ^{40}Ar 195

Arora, C. L.—
See Soni, K. R. 575

Astronomy
Atmospheric gravity wave production for total solar eclipse of 23 October 1976 287
Balloon investigation of galactic γ-ray lines with high resolution Ge(Li) spectrometer 375
Galactic γ-ray lines resulting from interactions between low energy cosmic rays and interstellar medium 383
Observations of SNRs in Magellanic Clouds 123
Optical positions for identifications from MC2 and MC3 catalogues 511
See also Radio astronomy

Astrophysics
Absorption of curvature radiation 49
Cylindrical pulsar magnetosphere model with particle inertia 681
Evolution of radio emission from young SNRs according to observational data 95
Kinematic diffusion of scalar quantities in turbulent velocity fields 503
Laboratory modelling of neutron star magnetospheres 71
Model of solar X-ray bright points and ephemeral active regions 671
Propagation effects on polarization of pulsar radio emission 61
Theory of one-dimensional isothermal blast waves in magnetic field 491

Atomic physics: helium 2^3S densities and excitation mechanisms in He–Cd$^+$ laser 561

Attard, A. C.—
See Devins, D. W. 323
Henderson, R. S. 411

Ball, S. M.—
Atmospheric gravity wave production for the Australian total solar eclipse of 23 October 1976 287

Barium: resonance neutron capture in ^{138}Ba 213

Batty, M. J.—
Models of radio recombination line sources 261

Beale, D. J., Poletti, A. R., and Southon, J. R.—
Gamma-ray studies using a solid argon target: properties of states in ^{40}K and ^{40}Ar 195

Bhattacharyya, D. P., and Roychoudhury, R. K.—
Sea level muon spectrum and muon charge ratio derived from CERN results for nucleon–nucleus inelastic interactions 369

Birch, J. A., Collins, J. G., and White, G. K.—
Heat capacities and Grüneisen parameters for NaF and NaBr below 25 K 463

Bolton, J. G.—
See Savage, Ann S46

Bolton, J. G., Wright, Alan E., and Savage, Ann—
The Parkes 2700 MHz survey (fourteenth part): Catalogue for declinations $-4°$ to $-15°$, right ascensions 10^h to 15^h S46
Abstract to S46 415

Branford, D.—
Comment on recent results for ^{40}Ca giant resonances obtained from the ^{40}Ca(^{3}He, ^{3}He′)^{40}Ca* → ^{36}Ar+α reaction 279

Buchdahl, H. A.—
Perturbed characteristic functions: application to the linearized gravitational field 405

Burman, R. R., and Mestel, L.—
A cylindrical pulsar magnetosphere model with particle inertia 681

Butler, P. H., Haase, R. W., and Wybourne, B. G.—
Calculation of 3*jm* factors and the matrix elements of E_7 group generators 137

Calcium: comment on recent results for ^{40}Ca giant resonances 279
Calcium: γ-ray decay of weak s resonances in ^{40}Ca 439
Caswell, J. L.—
See Haynes, R. F. S48
Caswell, J. L., and Lerche, I.—
Galactic supernova remnants: radio evolution and population characteristics 79
Cerium: resonance neutron capture in ^{140}Ce 213
Chromium: cross section measurements in ^{54}Cr(p, γ)^{55}Mn 335
Clark, G. J.—
See Switkowski, Z. E. 343
Clark, P. D., Johnston, A., and Ophel, T. R.—
Widths of the 14·32 and 14·40 MeV levels in ^{16}O 283
Clayton, E.—
See Rose, E. K. 525
Cleary, M. N.—
See Heiles, C. S47
Cohen, D. D.—
See Allen, B. J. 447
Collins, J. G.—
See Birch, J. A. 463
Cook, J. L.—
See Rose, E. K. 525
Cordes, J. M.—
Pulsar microstructure: periodicities, polarization and probes of pulsar magnetospheres 9
See also Fowler, L. A. 35
Cosmic rays: sea level muon spectrum and muon charge ratio 369

Devins, D. W.—
See Henderson, R. S. 411
Devins, D. W., Friesel, D. L., Jones, W. P., Attard, A. C., Svalbe, I. D., Officer, V. C., Henderson, R. S., Spicer, B. M., and Shute, G. G.—
The ^{12}C(p, 2p)^{11}B reaction at 100 MeV 323
Dodd, L. R.—
Simplified DWBA for heavy ion induced transfer at high energies 173
Dopita, M. A.—
Optical observations of SNRs in the Magellanic Clouds 123

Electromagnetism: radiation properties of arc antennas in warm plasma 575
Eremin, B. G., Zheleznyakov, V. V., Kostrov, A. V., Slutsker, Ya. Z., and Suvorov, E. V.—
Laboratory modelling of neutron star magnetospheres 71

Fowler, L. A., Cordes, J. M., and Taylor, J. H.—
Progress report on the binary pulsar 1913+16 35
Friesel, D. L.—
See Devins, D. W. 323
Henderson, R. S. 411
Fukui, Y., and Morita, T.—
The equilibrium statistical mechanics of a one-dimensional self-gravitational system 289

Gaseous electronics
Accuracy of numerical solutions of Boltzmann's equation 231
Comparison between Boltzmann and Monte Carlo methods for determination of transport coefficients in molecular hydrogen 255
General relativity
Existence and stability of circular orbits in Schwarzschild field with nonvanishing cosmological constant 293
Perturbed characteristic functions 405
George, E. P., Okamoto, K., Nakamura, Y., and Hamada, T.—
Quantum theory of energy loss by test ions to plasma electrons 223
Grace, J. R.—
See McIntosh, A. I. 561
Gravity: equilibrium statistical mechanics of one-dimensional self-gravitational system 289
Gravity wave production, atmospheric, for total solar eclipse of 23 October 1976 287
Gupta, J. B.—
See Kumar, K. 307

Haase, R. W.—
See Butler, P. H. 137
Hamada, T.—
See George, E. P. 223
Hamilton, J. H.—
See Kumar, K. 307
Haynes, R. F., Caswell, J. L., and Simons, L. W. J.—
A catalogue of 5 GHz galactic plane sources S48
Abstract to S48 415
Haynes, R. F., Jauncey, David L., Lerche, I., and Murdin, P. G.—
Nature of Circinus X-1 43
Heggie, J. C. P.—
See Switkowski, Z. E. 343
Heiles, C., and Cleary, M. N.—
The HI column density as a function of position in the southern sky S47
Abstract to S47 415
Henderson, R. S.—
See Devins, D. W. 323
Henderson, R. S., Spicer, B. M., Svalbe, I. D., Officer, V. C., Shute, G. G., Devins, D. W., Friesel, D. L., Jones, W. P., and Attard, A. C.—
4^- particle–hole states in ^{16}O 411
Hirasima, Y.—
See Yoshimori, M. 375
Howes, R. J.—
Existence and stability of circular orbits in a Schwarzschild field with non-vanishing cosmological constant 293
Hunter, Scott R.—
See Reid, Ivan D. 255

Issi, J-P.—
Low temperature transport properties of the group V semimetals 585
Izvekova, V. A., Kuzmin, A. D., Molofeev, V. M., and Shitov, Yu. P.—
Energy spectra and pulse shapes of pulsars at metre wavelengths 25

Jauncey, David L.—
See Haynes, R. F. 43
Jewsbury, Peter—
Theoretical analysis of plasmon dispersion in simple metals 361
Johnson, C. H. J.—
On the functional form of the transition probabilities in the Monte Carlo method as used in statistical mechanics 455
Johnson, P. B., and Rayne, J. A.—
Temperature dependence of carrier scattering rate in copper from magnetoacoustic experiments 641
Johnston, A.—
See Clark, P. D. 283
Jones, G. D.—
Spectroscopy of ionic crystals: the hydrogenated calcium fluoride system 629
Jones, W. P.—
See Devins, D. W. 323
Henderson, R. S. 411
Joshi, G. C.—
See Anderson, Ronald 533

Kennett, S. R.—
See Wilkinson, R. J. 335
Knat'ko, V. A., Martsynkevich, B. A., and Rudak, E. A.—
An analysis of the γ-ray decay of weak s resonances in ^{40}Ca 439
Koo, W. K., and Tassie, L. J.—
Bounds for the centre-of-mass-corrected energy-weighted sum rules for nuclear form factors and multipole moments 427
Kostenko, V. I.—
See Matveyenko, L. I. 105
Kostrov, A. V.
See Eremin, B. G. 71
Kumar, K., Gupta, J. B., and Hamilton, J. H.—
Dynamic deformation theory and multiphonon vibrational bands in ^{154}Gd 307
Kuzmin, A. D.—
See Izvekova, V. A. 25

Laser, hollow cathode He–Cd^+, excitation mechanisms in 561
Laser fields, intense, photon fission in 295
LEED peak widths: Fabry–Perot etalon analogue 529
Lerche, I.—
Kinematic diffusion of scalar quantities in turbulent velocity fields 503
Mathematical theory of one-dimensional isothermal blast waves in a magnetic field 491
See also Caswell, J. L. 79
Haynes, R. F. 43
Lindsey, J. F., Perlman, H. S., and Troup, G. J.—
Photon fission in intense laser fields and in the Coulomb field of a nucleus 295
Lozinskaya, T. A.—
The supernova remnants IC 443 and VRO 42.05.01: fast filaments and high-velocity gas 113

McIntosh, A. I., and Grace, J. R.—
Helium 2^3S densities and excitation mechanisms in a hollow cathode He–Cd^+ laser 561
Macklin, R. L.—
See Musgrove, A. R. de L. 213
Taylor, R. B. 551

Magellanic Clouds, optical observations of SNRs in 123

Manchester, R. N.—
The galactic distribution of pulsars 1

Manganese: cross section measurements in $^{54}Cr(p,\gamma)^{55}Mn$ 335

Mann, F. M.—
See Wilkinson, R. J. 335
Martsynkevich, B. A.—
See Knat'ko, V. A. 439
Matveyenko, L. I., and Kostenko, V. I.—
On the structure of the Crab Nebula 105
Melrose, D. B.—
Propagation effects on the polarization of pulsar radio emission 61
Mestel, L.—
See Burman, R. R. 681
Milne, D. K.—
A new catalogue of galactic SNRs corrected for distance from the galactic plane 83
Mohr, C. B. O.—
Heavy-ion elastic collisions and the nuclear surface diffuseness 541
Molofeev, V. M.—
See Izvekova, V. A. 25
Morita, T.—
See Fukui, Y. 289
Murakami, H.—
See Yoshimori, M. 375
Murdin, P. G.—
See Haynes, R. F. 43
Murdoch, H. S., and Sanitt, N.—
Optical positions for identifications from the MC2 and MC3 catalogues 511
Musgrove, A. R. de L.—
See Taylor, R. B. 551
Musgrove, A. R. de L., Allen, B. J., and Macklin, R. L.—
Resonance neutron capture in ^{138}Ba and ^{140}Ce and the prompt neutron correction to γ-ray detectors 213

Nakamura, Y.—
See George, E. P. 223

Nuclear physics
Aspects of exceptional group E_8 417
Bounds for centre-of-mass-corrected energy-weighted sum rules for nuclear form factors and multipole moments 427
Calculation of $3jm$ factors and matrix elements for E_7 group generators 137
$^{12}C(p,2p)^{11}B$ at 100 MeV 323
Comment on recent results for ^{40}Ca giant resonances 279
Comparison of effective two-nucleon interactions 155
Cross section measurements in $^{54}Cr(p,\gamma)^{55}Mn$ 335
4^- particle–hole states in ^{16}O 411
γ-ray decay of weak s resonances in ^{40}Ca 439
γ-ray studies using a solid argon target 195
Heavy-ion elastic collisions and nuclear surface diffuseness 541
keV neutron capture cross section of ^{170}Yb 447
keV neutron capture in ^{141}Pr 551
Meson mass formulae in $SU(5)$ 533
Multiphonon vibrational bands in ^{154}Gd 307
Partial wave analysis of $^{18}O(p,\alpha_0)^{15}N$ 187
Photon fission cross section in Coulomb field of nucleus 295
Prompt neutron correction to γ-ray detectors 213
Properties of states in ^{40}K and ^{40}Ar 195
Nucleon ground state 525
Resonance neutron capture in ^{138}Ba and ^{140}Ce 213
Simplified DWBA for heavy ion induced transfer at high energies 173
Techniques for characterization of chrome black solar absorber surfaces 343
Widths of 14·32 and 14·40 MeV levels in ^{16}O 283

Oceanography: effects of wavenumber spectrum of sea surface on laser beam reflection 469

Officer, V. C.—
See Devins, D. W. 323
Henderson, R. S. 411
Okamoto, K.—
See George, E. P. 223
Okudaira, K.—
See Yoshimori, M. 375
Ophel, T. R.—
See Clark, P. D. 283

Optics: Fabry–Perot analogue of LEED peak widths 529
Oxygen: widths of 14·32 and 14·40 MeV levels in ^{16}O 283

Payling, Richard, Ramsey, J. A., and Turner, R. G.—
LEED peak widths: a Fabry–Perot etalon analogue 529
Perlman, H. S.—
See Lindsey, J. F. 295
Petty, R. J.—
See Switkowski, Z. E. 343
Phillips, D. M.—
Effects of the wavenumber spectrum of a sea surface on laser beam reflection 469
Piddington, J. H.—
A model of solar X-ray bright points and ephemeral active regions 671

Plasma physics
Quantum theory of energy loss by test ions 223
Radiation properties of arc antennas in warm plasma 575

Poletti, A. R.—
See Beale, D. J. 195
Potassium: properties of states in ^{40}K 195
Praseodymium: keV neutron capture in ^{141}Pr 551

Radio astronomy
Absorption of curvature radiation in pulsar theory 49
Catalogue of 5 GHz galactic plane sources S48
Abstract to S48 415
Catalogue of galactic SNRs corrected for distance from the galactic plane 83
Energy spectra and pulse shapes of pulsars at metre wavelengths 25
Evolution of radio emission from young SNRs according to observational data 95
Galactic distribution of pulsars 1
Galactic SNRs: radio evolution and population characteristics 79
HI column density as function of position in southern sky S47
Abstract to S47 415
Laboratory modelling of neutron star magnetospheres 71
Models of radio recombination line sources 261
Nature of Circinus X-1 43
Optical positions for identifications from MC2 and MC3 catalogues 511
Parkes 2700 MHz catalogue and new optical identifications:
Fourteenth part S46
Abstract to S46 415
Periodicities and polarization of microstructure in pulsars 9
Progress report on binary pulsar 1913+16 35
Propagation effects on polarization of pulsar radio emission 61
Secular decreases in 927 MHz emission from SNRs Cas A and Tau A 93
SNRs IC 443 and VRO 42.05.01 113
Structure of Crab Nebula 105
Theory of one-dimensional isothermal blast waves in magnetic field 491

Ramsey, J. A.—
See Payling, Richard 529
Rayne, J. A.—
See Johnson, P. B. 641
Razin, V. A.—
See Vinyajkin, E. N. 93
Reid, Ivan D.—
An investigation of the accuracy of numerical solutions of Boltzmann's equation for electron swarms in gases with large inelastic cross sections 231
Reid, Ivan D., and Hunter, Scott R.—
Comparison between the Boltzmann and Monte Carlo simulation methods for the determination of electron swarm transport coefficients in molecular hydrogen 255
Rose, E. K., Cook, J. L., and Clayton, E.—
The nucleon ground state 525
Roychoudhury, R. K.—
See Bhattacharyya, D. P. 369
Rudak, E. A.—
See Knat'ko, V. A. 439

Sanitt, N.—
See Murdoch, H. S. 511
Sargood, D. G.—
See Wilkinson, R. J. 335
Savage, Ann—
See Bolton, J. G. S46
Savage, Ann, and Bolton, J. G.—
New optical identifications from the fourteenth part of the Parkes 2700 MHz survey: Declinations $-4°$ to $-15°$, right ascensions 10^h to 15^h S46
Abstract to S46 415

Shaposhnikov, V. E.—
See Zheleznyakov, V. V. 49
Shitov, Yu. P.—
See Izvekova, V. A. 25
Shute, G. G.—
See Devins, D. W. 323
Henderson, R. S. 411
Simons, L. W. J.—
See Haynes, R. F. S48
Slutsker, Ya. Z.—
See Eremin, B. G. 71
Smith, R., and Amos, K.—
A comparison of effective two-nucleon interactions appropriate for use in analyses of inelastic nucleon scattering 155

Sodium bromide and sodium fluoride, heat capacities and Grüneisen parameters below 25 K of 463
Solar energy: nuclear techniques for characterization of chrome black solar absorber surfaces 343
Solar physics: model of X-ray bright points and ephemeral active regions 671

Solid state physics
Far infrared absorption by amorphous semiconductors 663
Heat capacities and Grüneisen parameters of NaF and NaBr below 25 K 463
Low temperature transport properties of group V semimetals 585
Nuclear orientation and its applications 647
Nuclear techniques for characterization of chrome black solar absorber surfaces 343
Plasmon dispersion in simple metals 361
Spectroscopy of ionic crystals 629
Temperature dependence of carrier scattering rate in copper 641

Soni, K. R., and Arora, C. L.—
Radiation properties of arc antennas in a warm plasma 575
Southon, J. R.—
See Beale, D. J. 195
Spicer, B. M.—
See Devins, D. W. 323
Henderson, R. S. 411
Wild, L. W. J. 187
Stankevich, K. S.—
Evolution of the radio emission from young SNRs according to observational data 95

Statistical mechanics
Functional form of transition probabilities in Monte Carlo method 455
Theory of one-dimensional self-gravitational system 289

Suvorov, E. V.—
See Eremin, B. G. 71
Svalbe, I. D.—
See Devins, D. W. 323
Henderson, R. S. 411
Switkowski, Z. E.—
See Wilkinson, R. J. 335
Switkowski, Z. E., Heggie, J. C. P., Clark, G. J., and Petty, R. J.—
Use of nuclear techniques in the characterization of chrome black solar absorber surfaces 343

Tassie, L. J.—
See Koo, W. K. 427
Taylor, J. H.—
See Fowler, L. A. 35
Taylor, R. B., Allen, B. J., Musgrove, A. R. de L., and Macklin, R. L.—
keV neutron capture in ^{141}Pr 551
Trodahl, H. J.—
Far infrared absorption by tetrahedrally bonded amorphous semiconductors 663
Troup, G. J.—
See Lindsey, J. F. 295
Turner, R. G.—
See Payling, Richard 529
Turrell, B. G.—
Nuclear orientation and its application in solid state physics 647

Vinyajkin, E. N., and Razin, V. A.—
Secular decreases in the 927 MHz emission from the supernova remnants Cas A and Tau A 93

Watanabe, H.—
See Yoshimori, M. 375
White, G. K.—
See Birch, J. A. 463
Wild, L. W. J., and Spicer, B. M.—
Partial wave analysis of the $^{18}O(p,\alpha_0)^{15}N$ reaction 187
Wilkinson, R. J., Kennett, S. R., Switkowski, Z. E., Sargood, D. G., and Mann, F. M.—
Cross section measurements in the $^{54}Cr(p,\gamma)^{55}Mn$ reaction 335

Wright, Alan E.—
See Bolton, J. G. S46
Wybourne, B. G.—
Aspects of the exceptional group E_8 417
See also Butler, P. H. 137

Yoshimori, Masato—
Galactic γ-ray lines resulting from interactions between low energy cosmic rays and the interstellar medium 383
Yoshimori, M., Watanabe, H., Okudaira, K., Hirasima, Y., and Murakami, H.—
A balloon investigation of galactic γ-ray lines with a high resolution Ge(Li) spectrometer 375
Ytterbium: keV neutron capture cross section of ^{170}Yb 447

Zheleznyakov, V. V.—
See Eremin, B. G. 71
Zheleznyakov, V. V., and Shaposhnikov, V. E.—
Absorption of curvature radiation 49
